Overwhelming response!

We received an incredible number of fantastic responses by students and parents pleased with the successes achieved through participation in an ALOHA program. We even received artwork - see below!

If you submitted a success story, watch your email in-box to find out if you won one of our prizes - (1) iPad, a \$100 Amazon gift card (3), or a \$50 Amazon gift card (5).

We will be posting a special edition with our winners testimonials and pictures.

Top 5 Warning Signs that a Child is Struggling

ALOHA Mind Math's top 5 warning signs indicate a child's learning could be suffering. It is important for parents to act quickly upon these signs.

If your child is experiencing any of the following, it may suggest that your child is struggling in school and may need help.

- 1. Is the child's morning routine draining for parents and/or the family?
- 2. Has the child's interest in school changed?
- 3. Has the frequency and amount of homework lessened?
- 4. Is their school work performance degrading or unknown?
- 5. Does the child not want to talk about school and become irritated when doing assignments?

ALOHA may be able to help your child concentrate better, improve reading, writing and math skills, providing more confidence in the rest of their life. Read the rest of the article and find out more about how ALOHA might help a child you love here -

Reading As Important As Math

National reading week in America this year focused on

Dr. Seuss and his March 2 birthday. Read Across America week finishes up on March 7, but at ALOHA we celebrate reading every day.

We have programs at our centers that encourage our students to be better readers, as well as, writers. Many of our students have won awards for their writing skills.

A Pie for Pi

The number π is a mathematical constant, the ratio of a circle's circumference to its diameter,

approximately equal to 3.14159. It has been represented by the Greek letter "π" since the mid-18th century though it is also sometimes spelled out as "pi".

The math world celebrates Pi day on March 14 every

year. How can you celebrate? Read more here: http://alohamindmath.com/blog/pi-day-3-14/

How quickly can you solve -

984 x 42 =

This is a sample Level 7 question. Did you need a calculator?

How many did you count?

How many ways can you spell Shamrock in this Pascal's Triangle? Email your answer to social@aloha-usa.com you could win a prize.

Focus on Child Development

Parents are always on the lookout for a good quality education for their children. Globally, education in terms of math and reading is very low. The reason is that children find these subjects difficult and hence, do not pursue them further. Some children really need help and some children just need gentle quidance. ALOHA Mind Math enrichment programs

are specifically designed to work with each child to help them improve. Programs are very affordable so that every family can help their child succeed.

If you would be interested in finding out more about offering these types of program to children in your community, read more here:
